BREEAM

Commercial EPC Quick Quote

If you have an urgent requirement for a Commercial EPC, just use our 'Quick Quote' system.

Simply email a set of sales particulars to info@colesknapp.co.uk and we will return an email with our fee quote and availability.

If you don't have access to particulars then let us have information on:

- The address of the property including postcode
- The use of the building (i.e. shop, warehouse/offices etc)
- The size of the building (stating whether the measurement is gross or net, feet or metres) if known

We will respond very quickly and will always do our utmost to meet even the tightest of deadlines.

Sustainable Development Roadshow

When it comes to environmental issues the construction industry has long had a major impact but new 'sustainable development' legislation tackles that. Andrew Knapp of Coles Knapp has been on the road spreading the news of the legislation to those people who are at the fore front of implementing it through a series of seminars.

Andrew said "Our seminars on the new legislation and the way it assesses the environmental impacts of developments have now been taken up by Denbighshire CC, Conwy CC, Powys CC, Eryri and Cheshire & District Building Control Surveyors Association, with a presentation

to the Federation of Master Builders upcoming in March. All parties dealing with construction need to know about the 'Code for Sustainable Homes' and its commercial equivalent, 'BREEAM', especially in Wales where the Assembly are leading the UK in terms of requirements. Our seminar has gone down well - and has provoked what could politely be called 'lively debate' wherever it has been run".

Should you or a client be interested in the Sustainable Development Seminar please contact us at info@colesknapp.co.uk

Choosing your next car and want to think Green?

'Act on CO₂' has an excellent webpage that lists the greenest option in all car categories from 'executive' to 'hot hatch', from 'family' to 'large 4 x 4'. Simply go to <http://tiny.cc/luqmh> and you can search for those with the lowest emissions...and the lowest tax brackets for both road tax and company car tax. Better still – get on your bike!
